

# User Stories

# Endymion - Member of the IPS team

## CREATE A NEW ROUTE

- open web router in browser
- select/ find sources and destinations that they are interested in
- having selected these, the UI displays these to them
- identify & select source that they would like to route from.
- UI displays valid potential destinations for route/s
- select a destination
- the UI displays to the user that a route is being created
- the UI displays to the user that a route has been created
- This can happen as many times as desired (including from the same source)

## DELETE A ROUTE

- open web router in browser
- select/ find sources and destinations that they are interested in
- having selected these, the UI displays these to them
- identify & select the route that they would like to destroy using UI 'destroy' element.
- the UI displays to the user that a route is being destroyed
- the UI displays to the user that a route has been destroyed
- This can happen as many times as desired (including from the same source)
